

Environmental Statement

Sheffield Testing Laboratories Limited is a responsible, independent provider of testing and calibration services to national and international standards and is accredited by the United Kingdom Accreditation Service to BS EN ISO 17025.

Our main areas of activity are the testing and calibration of submitted materials and measuring equipment from clients, which is processed accordingly and then returned.

Disposal of waste and effluents is managed via recognised agencies or approved companies.

The consumption of energy and raw materials and its effect on the environment is monitored and reviewed on a regular basis.

Our aim is to reduce our energy needs and waste production year on year.

D R Tame
